

**EQACC SOLAR**

# **10kW Photovoltaic Container for Wastewater Treatment Plants**

## Overview

---

Can photovoltaic conversion of solar energy be used in wastewater treatment?

The application of photovoltaic conversion of solar energy in wastewater treatment is described and the research progress of photovoltaic conversion in electrooxidation system, reverse osmosis process, electrocoagulation process, aeration equipment, electroflocculation technology and fenton technology is reviewed.

What is the PV potential of a wastewater treatment plant (WWTP)?

The PV potential of a WWTP is correlated with its planned wastewater treatment capacity. The number of wastewater treatment plants (WWTPs) in China is fast growing as the country's urbanization accelerates. WWTPs, part of the high-energy-consumption industry, must use a lot of energy in wastewater treatment.

Can solar PV be used in wastewater treatment plants?

Strazzabosco et al. assessed the status of solar PV in WWTPs of various sizes in California, USA, and determined the potential of solar PV in the wastewater industry. Colacicco et al. proposed a solar PV design method for WWTPs to optimize the energy consumption of oxidation tanks in WWTPs.

Can solar PV Design Optimize oxidation tanks in WWTPs?

Colacicco et al. proposed a solar PV design method for WWTPs to optimize the energy consumption of oxidation tanks in WWTPs. Campana et al. realized 100% renewable WWTPs by combining a PV system with wind turbines, multi-energy storage technologies, and reverse tertiary osmosis treatment to absorb the power production surpluses.
