

EQACC SOLAR

150-foot Spanish photovoltaic container for oil platforms

Overview

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.

Home Energy Storage (Stackble system)

Product Introduction

- 1 Scalable from 10kWh to 50kWh
- 2 Self-Consumption Optimization
- 3 Integrated with inverter to avoid the compatibility problem
- 4 LFP battery - safest and long cycle life
- 5 Stackable design - effortless installation
- 6 Capable of High-Powered Emergency-Backup and Off-Grid Function
