

EQACC SOLAR

20kW Photovoltaic Container Used in a Portuguese Steel Plant

Overview

What is the largest floating solar plant in Europe?

The Alqueva floating solar photovoltaic plant is today the largest floating solar plant in Europe on a reservoir: with around 12 thousand photovoltaic panels and an annual production capacity of 7.5 GWh, it supplies approximately 1500 families in the Portel and Moura region.

When did EDP inaugurate the new floating solar photovoltaic power plant?

In July 2022 EDP inaugurated the new floating solar photovoltaic power plant in Alqueva. Innovation is at the heart of our strategy and the development of floating solar technology marked a turning point in the national energy panorama.

What is the Alqueva Floating photovoltaic project?

The Alqueva Floating Photovoltaic project is one of EDP's most innovative solar energy projects: a floating power plant with around 12,000 photovoltaic panels in the Alqueva dam reservoir. The platform was placed in its definitive location in May 2022 and, in June, the project completed new stages such as energisation.

How does LZY's photovoltaic power plant work?

LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly.

20kW Photovoltaic Container Used in a Portuguese Steel Plant

ALUMERO systems -- solarfold

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi ...
