

## **EQACC SOLAR**

# **20kw solar system**

## Overview

---

How much does a 20kW Solar System cost?

Based on current electricity costs, you can expect a 20% return on your investment per year on the panels alone. The typical cost of a 20kW solar system is approximately \$40,000. However, it is important to note that prices have come down substantially over the past decade, making solar energy more affordable for a wider range of consumers.

How big is a 20 kW solar system?

Most solar panels have a capacity of 300 watts. To achieve a 20kW solar system, you will need 67 or more panels. Each panel occupies approximately 17 square feet, resulting in a total footprint of 1133 square feet for a 20kW solar system.

How does a 20kW Solar System work?

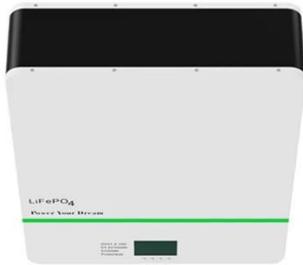

With a 20kW solar system, you can generate more electricity than you consume. The excess electricity can be sold back to the grid, allowing you to earn money from your solar panels. Based on current electricity costs, you can expect a 20% return on your investment per year on the panels alone.

Can a 20 kW solar system power a house?

A 20kW solar energy system can enable you to power your home autonomously. However, you will need solar batteries to store excess energy during periods when sunlight is limited or absent, like at night or on cloudy days. How much space will the solar panels take on my roof or ground?
