240v circuit breaker for sale in Sydney

Overview

What is a 240V circuit breaker?

A circuit breaker 240V is also known as a double-pole circuit breaker. It is mainly used to protect a dedicated circuit for high-power appliances such as electric ranges, air conditioners, and more. This breaker is rated chiefly from 20 to 60 amps. Since a 240V breaker is as big as two 120v breakers, it takes up two places in a load center.

Which 240V equipment should I buy?

Ensure the safety and efficiency of your electrical systems with our range of 240V equipment, including DIN enclosures, safety switch/circuit breaker combos, and power inlets. With popular items from brands like GEN3 and Transco, you can rely on their outstanding quality and performance.

Can a circuit breaker be used multiple times?

Unlike a fuse, a circuit breaker can be used multiple times. We stock circuit breakers designed for low voltage AC & DC applications including automotive bladed breakers, DIN rail mount circuit breakers, panel mount circuit breakers, and surface mount circuit breakers with manual or automatic reset.
