

EQACC SOLAR

30kW Photovoltaic Container Used in a Hospital in the UK

Overview

Can solar power save Leeds NHS trust money?

Another standout project comes from Leeds Teaching Hospital NHS Trust. Their solar photovoltaic canopy over the car park at Wharfedale Hospital provides sustainable power to the hospital, reducing its reliance on conventional energy sources. Last year, the 617 solar panels saved the trust over £120,000 in electricity costs.

Is solar energy a viable option for medical building in the UK?

This commitment to affordability makes solar energy for medical building in the UK a viable option. Solar4Good is a leading provider of solar panels for the UK hospitals, offering tailored solutions to address the unique energy challenges medical facilities face.

Can solar power save the NHS?

Last year, the 617 solar panels saved the trust over £120,000 in electricity costs. And then there's the Manchester University NHS Foundation Trust, home to the UK's first net-zero inpatient hospital. The Trafford Hospital, birthplace of the NHS, is not just a leap for the trust, but a symbolic step forward for the entire healthcare system.

Why should hospitals install solar panels in the UK?

Additionally, the financial benefits of solar panel installation for hospitals in the UK are undeniable. Reduced energy costs free up valuable resources to improve patient care and acquire new medical equipment. Solar4Good is here to guide you every step of the way.
