

**EQACC SOLAR**

# **30kw solar off-grid system design solution**

## Overview

---

What is an off-grid 30kW Solar System?

An off-grid 30kW solar system consists of solar panels, a solar inverter, and a battery among other necessary gadgets. The battery, which is sufficiently powerful to run up to 24 kW load, stores the extra power generated by the solar panels to make it useful in the future.

What is an off grid solution solar kit?

An off grid solution solar kit is a pre-assembled set of components designed to provide you with a specific energy goal. It allows you to track your usage, automate your life, and control your IoT devices using our Off Grid Solution Web, Android, and iOS App.

What is a 50kw off-grid Solar System?

In a 50kW off grid solar system, you will get solar panels, off-grid solar inverter, solar batteries and other solar accessories. This system is specially designed to provide long power backups during power outages or nights. Solar panels generate electricity by absorbing the sunlight in the daytime and run your connected load.

What is a solar off-grid system?

It's a solar power set up that generates continuous power supply from solar panels and stores the electricity in batteries. The system does not need grid connection to operate. The entire solar off-grid system is a combination of: UTI Solar offers a wide range of off grid solar solutions from 1 kW to 20kW .

## 30kw solar off-grid system design solution
