

**EQACC SOLAR**

# **350kW Mobile Energy Storage Container for Cement Plants**

## Overview

---

Can a cement-based energy storage system be used in large-scale construction?

The integration of cement-based energy storage systems into large-scale construction represents a transformative approach to sustainable infrastructure. These systems aim to combine mechanical load-bearing capacity with electrochemical energy storage, offering a promising solution for developing energy-efficient buildings and smart infrastructure.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a cement based energy storage system?

The majority of cement based energy storage systems remain only partially integrated; some utilize solid cement based electrolytes combined with conventional or hybrid electrodes, while others use carbon cement electrodes with liquid electrolytes.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

## 350kW Mobile Energy Storage Container for Cement Plants

---

### Containerized 215kwh, 372kwh battery ...

The 1 MWh lithium-ion battery storage system, BMS, energy storage monitoring system, air conditioning system, fire protection ...
