3MW solar power

Overview

Can a 3MW solar power plant run a commercial establishment?

A 3MW solar power plant can run a commercial establishment independently from the Electricity grid. This size of solar farms takes up 14 to 15 acres of space and gives about 12000 kWh of low-cost electricity every day. Surplus power can subsequently be sold to the Electricity DISCOMs as per net metering mechanism of respective state government.

Should you invest in a 3MW solar power plant?

If you are looking to get a 3MW solar power plant for your Manufacturing units, business or industry, you can choose to invest in your plant through either of the two models. In the CAPEX or one-time investment model, the consumer chooses to make an upfront capital expenditure.

How accurate is a 3MW solar power plant cost and profit?

The accurate 3MW solar power plant cost and profit require an on-site solar assessment and a personalized quote from a professional solar company. There are three types of solar plants that work on the same principle of 'Photovoltaic Effect'.

How much does a 3MW solar power plant cost in India?

On average, the cost of a 3MW solar power plant in India ranges between Rs 11 to 15 crores. Several factors influence the initial solar investment. The key component making up a solar power plant is the solar panel which comes in various forms.
