

EQACC SOLAR

40-foot solar-powered container used in EU subway stations

Overview

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and mobile operation. What is a mobile solar container portable PV power station?

Introducing our cutting-edge solution for sustainable energy production: the Mobile Solar Container Portable PV Power Stations. Available in both 20ft and 40ft variants, these innovative containers are designed to revolutionize the way we harness and utilize solar power.

What are mobile solar containers?

Available in both 20ft and 40ft variants, these innovative containers are designed to revolutionize the way we harness and utilize solar power. Efficient Solar Power Generation: Our Mobile Solar Containers are equipped with high-efficiency solar panels that capture and convert sunlight into clean, renewable energy.

What is a 20ft & 40ft solar container?

Whether you choose the 20ft or 40ft version, the interior can be configured to house the required number of solar panels, batteries, inverters, and other components, providing flexibility to meet varying energy demands. On-Board Energy Storage: To ensure uninterrupted power availability, these containers come with advanced energy storage solutions.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.
