

## EQACC SOLAR

# 400 million energy storage project

## Overview

---

What is the Lingshou 200 mw/400 MWh energy storage project?

On September 8, the Lingshou 200 MW/400 MWh standalone energy storage project—jointly developed by EVE Energy and State Grid Power Technology—was successfully energized. It represents the world's first large-scale application of 628 Ah cells in a 100 MWh-level facility, setting a new benchmark for the industry.

How many energy storage projects are there?

There are three energy storage projects. They will be located at three existing SCE power substations: 225 MW at Springvale Substation in Big Creek-Ventura, 200 MW at Hinson Substation in the Los Angeles Basin, and 112.5 MW at Etiwanda Substation in the Los Angeles Basin.

Where are the energy storage projects being built?

The energy storage projects will be located at three existing SCE power substations: 225 MW at Springvale Substation in Big Creek-Ventura, 200 MW at Hinson Substation in the Los Angeles Basin, and 112.5 MW at Etiwanda Substation in the Los Angeles Basin.

How many new storage projects have been approved in the developing world?

Twelve new projects across the developing world have already been approved, including in Bangladesh, Brazil, Colombia, Haiti, Honduras, India, Indonesia, the Maldives, and Ukraine. In the next three years, CIF plans to create 1.8 GW of new storage capacity and integrate an additional 16 GW.
