

**EQACC SOLAR**

# **50kW Off-Grid Solar Container in Vietnam**

## Overview

---

How much solar power does Vietnam have?

This included 16 billion kWh from solar power and 7.3 billion kWh from wind energy, according to data from Vietnam Electricity. Solar power, in particular, has seen significant expansion due to the implementation of feed-in tariffs and the increasing adoption of rooftop solar systems.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Does Vietnam have a solar energy strategy?

Vietnam is making significant strides in its renewable energy sector, focusing on solar power as a key component of its energy strategy. By 2030, the country aims to generate 16% of its energy from solar, driven by substantial investments in solar farms across the nation.

How do private solar power plants work in Vietnam?

Previously, owners of private solar power plants, whether rooftop or large-scale, could only sell electricity to the grid through conventional power purchase agreements (PPAs), with no option for direct sales to consumers. In Vietnam, there are two types of DPPAs: private-wire DPPAs and on-grid DPPAs.
