# **5G communication tower base station budget**

## Overview

---

How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

How much does 5G infrastructure cost?

The total cost of 5G infrastructure is staggering, with projections estimating that telecom companies will spend over \$2 trillion globally by 2030. This includes investments in spectrum, network densification, fiber backhaul, energy-efficient infrastructure, and emerging technologies such as AI and automation.
