5kw wind turbine grid-connected inverter

Overview

What is a wind turbine inverter kit?

Our wind turbine Inverter kits utilise the latest in 6 or 12 pulse AFE technology (25kW- 2MW) allowing for unity Power Factors to be maintained. Many wind turbines only generate at a fixed speed relative to the frequency of the grid either 50Hz or 60Hz. This limits the efficiency at lower wind speeds and may not be able to generate at all.

What is a 5kw off grid solar inverter?

A 5kw off grid solar inverter is a device that works with lithium battery or lead acid battery and provides uninterrupted power supply support for various fields like communication, industry equipment, military vehicles, and solar generating. This specific model is produced by the brand ELEC, which is a part of Sunerise Energy and focuses on R&D and production of off-grid inverters.

What is an on-grid 5kW inverter?

An on-grid 5kw inverter is easy to maintain and converts the direct current to alternating current for powering domestic appliances and even commercial equipment. These solar inverters typically offer high efficiency of around 93% to 96%. Also, the warranty period of these inverters is around 5-10 years.

What is a 5kw wind turbine?

With no need for expensive batteries our 5kw On Grid Wind Turbine is a simple easy maintenance free power source that will save you money and drive down the cost of the Electricity bills you currently receive from your Electricity supplier. Specifications; Packaging:

5kw wind turbine grid-connected inverter

5kW Inverter 220V 380V for Wind Turbine Generator Off-grid ...

We manufacture and sell wind turbine controllers, inverters, off-grid controllers, grid-connected controllers, off-grid inverters, grid-connected inverters and control inverters all in one ...
