70kw string inverter

Overview

Should you buy a 6kW string inverter?

If you're looking to free yourself from electric bills and your energy usage is in the medium range, this could be the system for you. This 6kW string inverter kit requires up to 345 square feet of space and generate 400 to 1,000 kilowatt hours (kWh) of alternating current (AC) power per month.

How efficient are sun-g03 solar inverters?

Exceptional Efficiency: The SUN-G03 inverters boast a maximum efficiency of up to 98.8%, with a European efficiency rating of up to 98.2%. This high efficiency translates to more energy being converted from the solar panels into usable electricity, minimizing losses and maximizing the return on investment for solar installations.

Are sun-g03 inverters IP65 rated?

Robust Design: Encased in an IP65-rated enclosure, the SUN-G03 inverters are designed to withstand harsh environmental conditions. Their intelligent air cooling system ensures efficient thermal management, allowing them to operate within a wide temperature range of -25°C to +60°C, with derating above 45°C.

What is a Deye 70-110k grid-connected inverter?

The Deye 70-110K grid-connected inverter is suited for medium and large-scale commercial rooftops and ground-mounted solar PV system in which reliability and stability are important. the full series inverter has 30% DC input oversizing ratio and 10% AC output overloading ratio, offering a faster return on investment.
