## Overview

---

What is a 72V lithium battery pack?

The cells in the 72v lithium battery pack are 18650 batteries, 18 mm in diameter, 65 mm in length, o-type cells. It can power scooters, boats, solar applications, and other electrical equipment that need higher electrical energy. There are several advantages of using lithium-ion batteries.

What is a 72V 20Ah lithium battery?

Ideal for lightweight electric vehicles and scooters, the 72V 20Ah lithium battery pack offers a balance between power and range. A step up from the 72V 20Ah lithium battery, this option provides more extended runtime while maintaining a compact design.

Which lithium battery is best for EVs?

Perfect for mid-range EVs, the 72V 40Ah lithium battery ensures consistent power output with an extended lifespan. With increased capacity, the 72V lithium battery 50Ah is suitable for high-performance electric motorcycles and heavy-duty applications.

How do you connect a BMS to a battery pack?

Connecting the BMS: B- Terminal: Connect to the main negative (-) terminal of the battery pack. B+ Terminal: Often already connected internally; check your BMS specifications. B1 (or B0): Connect to the most negative point (first cell's negative terminal). B2, B3, . . : Connect sequentially to the positive terminals of each cell in series.
