80kWh Energy Storage Container for Port Terminals for Sale

Overview

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?

.

How does a maritime energy storage system work?

The maritime energy storage system stores energy when demand is low, and delivers it back when demand increases, enhancing the performance of the vessel's power plant. The flow of energy is controlled by ABB's dynamic Energy Storage Control System.

How many container terminals are there in Shanghai?

The container terminals of the Port of Shanghai are mainly distributed in three port areas, namely Yangshan, Waigaoqiao and Wusong. There are altogether 49 container berths, 176 container gantry cranes and 7.58 million square meters of container yard.
