80kWh Juba Foldable Container Water Treatment Plant

Overview

What is a mobile water treatment & purification plant?

Mobile water treatment and purification plants are designed to cover emergency, temporary solutions such as construction sites or long-term water treatment requirements. These mobile systems are installed inside a seaworthy 20 or 40 ft containers or in combination to form complete systems with advanced water treatment and purification technologies.

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

What is a water treatment plant in container?

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal piping and wiring factory-built. This makes the plant ready for use when supplied, which financially can be an advantage, also in relation to the reduced amount of time used for deployment.

Can a mobile water treatment plant be used in a container?

This customer needed to upgrade the existing water treatment plant, but no free space at site was available. Mobile water treatment in a container was the solution of choice. Cooling water treatment for a chemical company in Russia. The company chose a plug-and-play 8' container installation for the water treatment.
