

EQACC SOLAR

80kw wind power generation system

Overview

Why should you buy a wes80 wind turbine?

You are also paid for the amount of electricity you feed back into the national grid. You save on your energy bills. The WES80 is a two bladed, high performance, reliable 80 kW midsize wind turbine with a rotor diameter of 18 meters. This wind turbine is especially designed for areas with a higher wind speed.

What is a Wes turbine?

Wind Energy Solutions BV (WES) is the manufacturer of the WES50, WES80, WES100 and WES250 midsize wind turbines. WES turbines are accessible and affordable, and are distributed around the world through a global network of trained and certified partners. WES turbines are ideally suitable for distributed wind power applications.

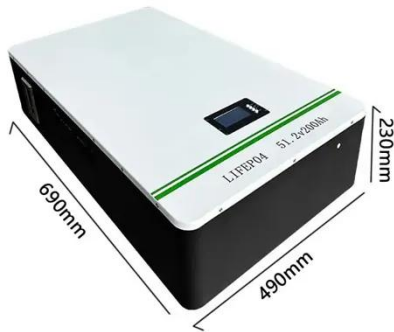

Are Wes Turbines suitable for distributed wind power applications?

WES turbines are ideally suitable for distributed wind power applications. WES wind turbines provide users with reduced energy costs and carbon emissions. They also enable users to take advantage of income opportunities related to power generation.

Where are wes80 turbines made?

WES80 turbines are manufactured and exported by WES in the Netherlands, and are sold, installed and maintained all over the world by a global network of certified and trained dealers. WES80 main characteristics High performance (With 6.5 m/s wind outputs 193.000 kWh/year). Over 750 units installed around the world.

80kw wind power generation system

Household Power Generation System High Speed 220V 380V ...

Household Power Generation System
High Speed 220V 380V Dual Voltage
Magnetic Alternator 50KW 80KW 100KW
Free Energy Generator 0 sold US
\$450.33 50% off US \$900.66 Tax ...
