

**EQACC SOLAR**

# **AGM solar container battery**

## Overview

---

### What are sealed AGM batteries?

Sealed AGM batteries are ideal for grid-tied solar systems with battery backup. They provide exceptionally reliable deep cycling performance and deliver the ultimate quality for your solar energy system.

### What is an AGM battery?

**AGM Battery Overview:** AGM (Absorbent Glass Mat) batteries are sealed lead-acid batteries that offer a maintenance-free and durable energy storage solution for solar systems. Benefits: They provide high power output, exceptional depth of discharge (up to 80%), and fast charging capabilities, making them suitable for solar energy applications.

### Are AGM batteries suitable for solar use?

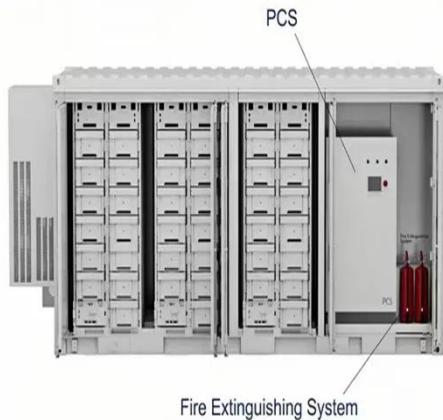

AGM batteries for solar are a cost-effective, high-performance alternative to lithium batteries and an excellent choice for both full- and part-time residences. With 50% being the standard for flooded lead acid batteries and 80% being the low end of the standard for lithium batteries, AGM batteries offer a good balance between cost and performance.

### Are AGM batteries good for off-grid solar systems?

AGM batteries are handy for small, off-grid solar systems. For example, a remote cabin with low energy demand and a small system on the roof may be the perfect candidate for an AGM battery bank. No maintenance is needed, and the relatively low upfront cost of lead-acid batteries makes AGM batteries ideal for these smaller, off-grid setups.
