

**EQACC SOLAR**

# **ASEAN container battery factory energy**

Sample Order  
UL/KC/CB/UN38.3/UL

## Overview

---

Does Singapore have a battery energy storage system?

Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space. Earlier this year, the city-state launched the region's largest battery energy storage system (BESS).

Does ASEAN need energy storage?

The ASEAN bloc has set the targets of 23% renewable energy in its Total Primary Energy Supply (TPES) and 35% renewable energy in ASEAN installed power capacity by 2025. This means that energy storage is required. Additionally, without BESS acceptance on a larger level, the needed funds won't materialise, and fewer BESS will be built.

Why is ASEAN falling behind in technology implementation?

However, the Association of Southeast Asian Nations (ASEAN) bloc is falling behind in technology implementation due to a lack of awareness and policy initiatives. Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space.

What is a battery energy storage system (BESS) in Singapore?

Singapore's new BESS will help mitigate the solar intermittency caused by changing weather conditions in the region's tropical climate. Because wind and solar resources aren't constantly available and predictable, they're referred to as intermittent energy resources. What Is a Battery Energy Storage System (BESS)?
