

# ASEAN mobile energy storage site inverter connected to the grid 6 9MWh

## Overview

---

How is ASEAN reshaping the power grid?

In recent years, the ASEAN's power grid landscape is evolving. The integration of Distributed Energy Resources (DERs), such as rooftop solar photo voltaics (PV) systems and battery energy storage, is reshaping ASEAN's power systems by increasing flexibility and resilience.

What is ASEAN Power Grid?

**3.1 ASEAN Power Grid** The ASEAN Power Grid (APG) has been one of seven programme areas under APAEC since 1999. It is meant to facilitate electricity trading among Member States through strategic interconnections and enhance the integration of their power systems.

What is the ASEAN Power Grid Advancement Programme (APG-AP)?

The ASEAN Power Grid Advancement Programme (APG-AP) is a strategic initiative designed to enhance regional energy security, affordability, and sustainability by advancing multilateral power trade and strengthening the APG.

Can ASEAN power utilities/authorities integrate a grid?

The Heads of ASEAN Power Utilities/Authorities (HAPUA) and ACE have investigated these possibilities in a series of ASEAN Interconnection Masterplan Studies (AIMS). Based on various grid integration scenarios, these projects have evaluated the potential for cross-border electricity trade and regional costs and benefits.
