Abu Dhabi Energy Storage Container 500kWh Cooperation

Overview

Chinese battery giant CATL and Masdar, the UAE's flagship renewable energy company, have announced a landmark partnership to develop the world's largest solar and battery energy storage system (BESS) project in Abu Dhabi. Will Masdar & EWEC build a solar-plus-storage project in Abu Dhabi?

Masdar and Emirates Water and Electricity Co. (EWEC) plan to build a \$6 billion, 5 GW/19 GWh solar-plus-storage project in Abu Dhabi, the United Arab Emirates, with operations set to start by 2027. Emirati state-owned renewable investment company Masdar is partnering with EWEC to build a giant solar and battery energy storage (BESS) facility.

Does EWEC have a large-scale solar project in Abu Dhabi?

EWEC has several large-scale solar projects in the region, including the 2 GW Al Dhafra solar project in Abu Dhabi. Earlier this month, it put out a request for proposals for 1.5 GW of solar.

What is the largest combined solar and battery energy storage system?

Delivering up to 1 gigawatt (GW) of baseload power every day generated from renewable energy, it will be the largest combined solar and battery energy storage system (BESS) in the world.

What is a 19gwh battery storage facility?

The 19GWh battery storage facility will enable seamless integration of solar power into the grid. By integrating state-of-the-art renewable technologies with energy storage solutions, this landmark project exemplifies the UAE's commitment to scaling innovative clean energy solutions to meet evolving energy demands.
