

EQACC SOLAR

Accra lithium energy storage power production plant

Overview

Why should Ghana invest in ewoyaa Lithium Project?

The Ewoyaa lithium project could position Ghana as a strategic supplier of lithium in the global market and help diversify its economy away from traditional commodities such as gold, cocoa, and oil. The project could also pave the way for further exploration and development of other lithium deposits in Ghana and the region.

Will ewoyaa be the first lithium mine in West Africa?

The Ewoyaa lithium project in Ghana is expected to start production in 2025 and become the first lithium mine in West Africa. The project could transform Ghana's economy and boost its green transition.

What is the Ewoyaa Lithium Project?

The Ewoyaa Lithium Project is Ghana's first lithium-producing mine and the flagship project of Atlantic Lithium Ltd. It is well located to excellent infrastructure and has proven to produce a spodumene concentrate product suitable for conversion to be used in EV batteries. The project is being advanced to production under an agreement with Piedmont Lithium.

Will Ghana become the first country in West Africa to produce lithium?

Ghana is set to become the first country in West Africa to produce lithium, a key component in electric vehicle batteries and renewable energy storage systems. The Ewoyaa lithium project, developed by Atlantic Lithium, is expected to start production in 2025 and reach its full capacity of 365,000 tonnes of lithium annually in 2026.
