# Airport energy storage charging pile

- ✓ **ALL IN ONE**
- ✓ **100Kw/174Kwh  
High Capacity**
- ✓ **Intelligent  
Integration**

## Overview

---

How much does Airport Charge pile cost?

According to the survey, the price of charge pile used in airport was 1 million Yuan/set, while the ordinary one in resident area is generally 80000 Yuan/set . Installation cost of airport charging pile is also high. Government subsidy policy is mainly for charging piles used by the public, and less for airports.

How many charging piles are planned to be built in airports?

Up to now, the number of charging piles planned to be built in airports has exceeded 500 and the planning investment from 2015 to 2018 has exceeded 120 million RMB. 3. Airport charging infrastructure demand forecast 3.1. Airside Demand of airport airside charging facilities was predicted by ratio of vehicle to pile.

How to predict demand for airport charging facilities/piles?

In order to predict the demand for airport charging facilities/piles, a demand prediction model was proposed for airports, which includes airside and landside of airports. The airside prediction model was calculated according to air traffic volume and vehicle pile ratio.

How many charging piles are there in China?

In 2017, a total number of 209 charging piles were built in 6 airports in China. Up to now, the number of charging piles planned to be built in airports has exceeded 500 and the planning investment from 2015 to 2018 has exceeded 120 million RMB. 3. Airport charging infrastructure demand forecast 3.1. Airside
