What is an uninterruptible power supply (UPS)?

***Definition:** The Uninterruptible Power Supply, or UPS for short, is a critical component of computer setups and other hardware systems that may need to function for a period of time following a loss of mains power. When this happens, the UPS powers the system until utility power is restored and it resumes recharging its internal battery backup.

How digitalization affects the demand for uninterruptible power supply (UPS)?

Increasing digitalization is expected to boost the demand for uninterruptible power supply (UPS). Digitalization heavily relies on computers, servers, and other IT equipment. These devices require a constant and stable power supply, which a UPS system provides. Therefore, the rising digitalization worldwide is propelling the market.
