## Overview

---

Who manufactures arc-resistant switchgear?

Eaton was the first major North American manufacturer to design, test, and manufacture arc-resistant switchgear in accordance with EEMAC G14.1. We now offer Type 2 and 2B arc-resistant switchgear assemblies, designed and tested in accordance with the IEEE C37.20.7, with Type VCP-W drawout vacuum circuit breakers.

What is an arc flash?

An arc flash is an electrical explosion where energy leaves the circuit that it is contained in and travels through the air. The blast from an arc event combines voltage, heat—up to 35,000 degrees Fahrenheit—and violent concussion. Even with special PPE, those in the vicinity of an arc flash risk injury or even death.

What is arc-resistant switchgear?

Because arc-resistant switchgear is specifically designed to contain and limit the damage incurred from internal arc faults, it provides the highest degree of protection to personnel, long-term savings, and a significant reduction in downtime.

What is arc quenching switchgear?

Arc Quenching Switchgear minimizes or eliminates damage to switchgear in the event of an arc fault, protecting valuable switchgear assets from electrical arc flash damage. It is designed to reduce peak fault current by at least 25% and peak stress on upstream equipment by at least 44% when compared to a bolted fault device.
