# Are rooftop solar panels expensive

## Overview

---

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Is rooftop solar a good investment?

Rooftop solar power represents one of the most impactful decisions homeowners can make for their finances, energy independence, and environmental impact. With 2025 bringing continued cost reductions, technological improvements, and strong federal incentives, the value proposition for rooftop solar has never been stronger.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

What is rooftop solar power?

Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. These systems convert sunlight directly into electrical energy through photovoltaic cells, providing clean, renewable power for your home or business.
