

Are there any new energy base stations in Cameroon

Overview

Constructed by Sinohydro, Memve'ele Hydroelectric Power Station, a 211-megawatt hydroelectric power station in the Ntem Valley locality in Cameroon's South Region was officially handed over to Cameroonian authorities for operation in October 2024. Which power station in Cameroon has the largest electricity generation capacity?

Song-Loulou is the power station with the largest installed electricity generation capacity in Cameroon, boasting 384 MW since 1981. Situated upstream of Edéa, it connects to the southern interconnected grid (RIS).

How much money does Cameroon need for energy projects?

The Cameroonian government states that Cameroon needs almost 2000 billion euros to finance its energy projects. These funds will support the construction of the Limbé gas power plant (350 MW), the Grand Eweng, Chollet, Kikot, Katsina Ala (285 MW), and Menchum (72 MW) hydroelectric dams, among others.

Will Cameroon have a solar power plant?

The Maroua and Guider power plants, Cameroon's first public solar project with a combined capacity of 30 MW, were commissioned by MINEE in September 2023. Additionally, a 20 MW solar power plant is planned for the city of Garoua.

When was the first hydroelectric power station built in Cameroon?

The first hydroelectric power stations in Cameroon were inaugurated in 1929 to supply electricity to the Muyuka region as a private operation.
