

**EQACC SOLAR**

# **Australia s \$900 million energy storage project**

## Overview

---

What are the biggest solar projects in Australia?

The largest project by capacity is Lightsource BP's 700 MW Sandy Creek Solar Farm in NSW. The next-biggest solar projects under construction are the same as at this stage last year: BJEI Australia's 300 MW Wellington North Solar Farm and ACEN Renewables' 400 MW Stubbo Solar, both in New South Wales.

What is the largest battery project in Australia?

The 850 MW / 1,680 MWh Waratah Super Battery in New South Wales remains the largest project in development by capacity, with that project having completed construction and now in the process of being commissioned. The next-largest is the 600 MW / 1,600 MWh Melbourne Renewable Energy Hub Battery Energy Storage System (Phase 1) in Victoria.

Which country commissioned the most solar projects in Australia?

Western Australia commissioned the most projects, with six, with a combined capacity of 262 MW. The largest project commissioned was BJEI Australia's 330 MW Wellington North Solar Farm in New South Wales. The project is now the third-largest operational solar farm in Australia.

Is energy storage a key pillar of Australia's business strategy?

Another Australian energy major, Origin Energy, has positioned energy storage as a central pillar of its business strategy. According to its FY2025 results, the company has now committed to approximately 1.7GW of battery projects with 6GWh of capacity. Construction is underway on multiple fronts, such as the 2.8GWh Eraring BESS in New South Wales.
