

EQACC SOLAR

Australian Solar Container 20kW Supplier

Overview

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

What is a 20kW commercial solar PV system?

A 20kW commercial solar PV system is ideal for businesses with low to medium energy usage. Rising grid electricity prices make this an even more attractive option. Should you have sufficient roof space, a 20kW solar system can also be outfitted into larger residential homes to effectively boost savings while meeting their power needs.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

Can a 20kW Solar System power a business?

It can easily power businesses with low to medium energy usage. Assuming your property receives at least 5 sun hours per day with the solar panels facing the South, your 20kW solar system can produce 2000 to 3000kWh of alternating current power monthly.
