# **BESS solar panels installed on residential roofs**

## Overview

---

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

Do I need a structural assessment before installing solar panels?

Before mounting solar panels, your roof must undergo a thorough structural assessment. Solar panels and mounting equipment add approximately 3-4 pounds per square foot of additional load to your roof structure. Key evaluation factors include: If your roof needs replacement, complete this work before solar installation.

What are the best and worst roof types for solar panels?

Discover the best and worst roof types for solar panels to ensure a smooth installation and maximum efficiency. Most roofs can support solar panels, but some materials and designs make installation smoother, safer, and more cost-effective. Tile roofs (clay, ceramic, concrete) – durable, long-lasting, and visually appealing.

Is there a guide to rooftop solar & Bess?

To help homeowners tackle this tangle of information, PNNL researchers Jessica Kerby and Bethel Tarekegne published an open-access guide to rooftop solar and BESS in Renewable Energy Focus.
