

**EQACC SOLAR**

# **Bandar Seri Begawan office building solar curtain wall brand**

## Overview

---

What is on-grid PV curtain wall?

On-Grid PV curtain wall has the dual characteristics of glass building materials and PV power generation. As a building material for power generation, PV curtain wall is mainly applied to the lighting roof, curtain wall facade, shading wall and other areas of commercial high-rise buildings. (1) Application Scene.

Why do we install solar panels at Balakong & Penang?

By installing solar panels across multiple production facilities and offices at Balakong as well as at Penang, we have lowered our carbon emissions and decreased dependence on non-renewable energy. Our solar panels across all facilities generate 6,500+ GJ annually, directly powering production while cutting emissions.

Who is PMB façade?

A trusted curtain wall supplier with over 30 years of experience, PMB Façade delivers aluminium façade solutions across seven countries.

What is a PV curtain wall?

The PV curtain wall is the most typical one in the integrated application of PV building. It combines PV power generation technology with curtain wall technology, which uses special resin materials to insert solar cells between glass materials and convert solar energy into electricity through the panels for use by enterprises.
