

EQACC SOLAR

Bangkok Solar Energy Site

Overview

What's going on with rooftop solar in Thailand?

Rooftop solar is also expanding fast, with the quota for public installations rising from 50 MW to 200 MW, plus an additional 50 MW dedicated to Bangkok. These changes reflect not just ambition, but momentum. Read Also: [The Promise of Thailand Renewable Energy Initiatives](#).

Why should Thailand invest in solar energy?

Solar energy is slated to be Thailand's largest renewable energy source in the coming years. It will be critical in driving the country's energy transition and achieving its decarbonisation goals. While growth has been steady, rapid deployment is needed over the next decade to make longer-term targets attainable.

Who is Bangkok solar power?

1. Bangkok Solar Power Co.Ltd Founded in 2007 as a subsidiary of Bangkok Cable Group, BSP has been developing its activities for providing the Engineering, Procurement, and Construction (EPC) solutions in relation to Photovoltaic (PV) Power Systems for domestic and international markets.

Why is Thailand relying on more than just solar?

To close this gap, Thailand is relying on more than just solar. The government's Alternative Energy Development Plan (AEDP) promotes energy diversification, including storage systems and emerging technologies like green hydrogen. These strategies are designed to not only boost generation capacity but also ensure energy stability and resilience.
