

EQACC SOLAR

Bangkok backup power storage device

Overview

What is a battery energy storage system?

Battery energy storage systems (BESS) are essential for buildings and renewable power generation facilities to ensure uninterrupted electricity supply. Renewable sources like solar and wind power are intermittent, and influenced by weather patterns. BESS mitigates this issue by storing electricity for future use.

Why do you need energy storage solutions?

Energy storage solutions can help stabilize your grid power with peak shaving and backup your renewable energy systems, thus taking the stress out of your life and helping you grow your business, cut costs and hit green targets with reliable, flexible and quality power supply on demand.

Could a sodium-ion battery be a new business opportunity in Thailand?

The Federation of Thai Industries' Renewable Energy Industry Club sees potential in sodium-ion battery (SIB) production as an alternative to lithium-ion batteries. SIBs, made from rock salt, could offer a new business opportunity given Thailand's abundant rock salt reserves.
