# Battery and energy storage container system

## Overview

---

What is a containerized battery energy storage system?

Let's dive in! What are containerized BESS?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a Solax containerized battery storage system?

SolaX containerized battery storage system delivers safe, efficient, and flexible energy storage solutions, optimized for large-scale power storage projects. As the world increasingly transitions to renewable energy, the need for effective energy storage solutions has never been more pressing.

What is a HJ-ESS-desl battery container?

The HJ-ESS-DESL series BESS container with a capacity of 372 - 1860 kWh utilizes advanced liquid-cooling technology to maintain the best temperature for all the battery modules. These liquid-cooled BESS systems assure maximum efficiency and longer battery life than conventional systems.
