

**EQACC SOLAR**

# **Battery cabinet contact system**

## Overview

---

What is a battery cabinet?

Our battery cabinet, also known as a battery enclosure or battery rack, is a specialized cabinet or housing designed to store and protect batteries used in various applications, including backup power systems, uninterruptible power supplies (UPS), renewable energy storage, telecommunications, and electric vehicles.

What is a battery cell contact system?

This article comprehensively guides you through what a battery cell contact system is. FPC is the most used CCS module due to the flexible and fine circuits, lightweight, thin thickness, small size, uniform dimension, stable signal, high reliability, and mature technology.

What type of batteries are used in energy storage cabinets?

Lithium batteries have become the most commonly used battery type in modern energy storage cabinets due to their high energy density, long life, low self-discharge rate and fast charge and discharge speed.

Why are battery cabinets important?

Battery cabinets are an essential component in battery-based energy storage systems. They not only protect the batteries from environmental factors but also contribute to the safety and efficiency of the overall system.
