Battery cabinet inspection column installation requirements

Overview

What should be inspected for incoming battery room equipment?

Incoming Battery room Equipment shall be visually inspected for damage / defects occurred during transportation and conformance to all applicable requirements. Battery room Equipment shall be new and unused.

What is a battery inspection checklist?

This detailed Battery Inspection Checklist ensures battery performance and safety. This checklist, which includes both visual and technical inspections, assists in identifying difficulties with mounting, cables, electrolyte levels, & voltage to ensure proper battery function.

What are the requirements for a battery room?

Battery room walls and floor shall be made of concrete construction. Battery rooms shall be provided with enclosed and gasketed (i.e., vapor tight) corrosion resistant lighting fixtures as specified in SAES-P-123. Battery room lighting shall be installed to provide a minimum level of illumination of 30-ft candles (300 lux).

How to perform a battery inspection?

The following is a complete approach for visual & technical battery inspection. Before starting the inspection, record the necessary information to identify the battery & its accompanying machinery: Record the battery's model. Voltage: Take note of the battery's voltage rating.
