Bc battery solar panel

Overview

Does BC Hydro offer solar & battery storage rebates?

As BC's largest utility, BC Hydro is making solar and battery solutions more accessible than ever. Battery storage is a game-changer for maximizing solar energy use. With these rebates, customers can add energy storage, reduce reliance on the grid, and gain more control over their energy use.

What is the BC Solar Initiative?

The BC Solar Initiative is part of our province's strategy to transition toward clean energy. It emphasizes expanding solar power and battery storage use throughout British Columbia and provides a range of programs and incentives to encourage the installation of solar energy systems in residential and commercial settings.

What is a back contact solar module?

Back Contact (BC) solar modules are photovoltaic panels in which all the electrical contacts — both positive and negative — are located on the rear side of the solar cell. This contrasts with most conventional technologies, where metallic contacts are present on the front, partially shading the light-absorbing surface.

How does a solar rebate work in BC?

A local electrical inspection is done. The passing report is sent to BC Hydro, who then gives "Permission to Operate." Your installer submits the final paperwork for your rebate. Time Frame: From your first call to an installer to your system being operational?
