Belgian Solar Container Fast Charging

Overview

Will Belgium's hyperfast expand chargepost's fast-charging infrastructure?

Germany-based ADS-TEC Energy said it has secured a new order from Belgium's HyperFast to supply more than a dozen ChargePost fast charging stations. The deployment, which will be supported by local energy platform MobilityPlus, is expected to significantly expand HyperFast's fast-charging infrastructure by the end of the year.

What is a hyperfast Charger?

Many locations lack sufficiently powerful grid connections to operate conventional fast chargers. With the battery-buffered solution from ADS-TEC Energy, HyperFast can provide charging capacities of up to 300 kW - without an expensive and lengthy expansion of the existing grid capacity.

What is hyperfast's new chargepost deployment?

The deployment, which will be supported by local energy platform MobilityPlus, is expected to significantly expand HyperFast's fast-charging infrastructure by the end of the year. The ChargePost units, which deliver up to 300kW of power, will be rolled out across HyperFast sites in Belgium.

Why are storm and Q8 launching a fast-charging network in Belgium?

It's the reason why Storm and mobility partner Q8 are working on the rollout of the first network of full-service fast-charging stations in Belgium. The network will consist of more than 200 fast-charging stations that provide 100% renewable energy. The sun also has a starring role to play in the transition to a climate-neutral society.
