

EQACC SOLAR

Botswana new house rooftop solar system

Overview

Does Kom-solar offer high-efficiency rooftop solar installations?

Kom-Solar delivers high-efficiency rooftop solar installations for a variety of roof types including Klip-Lok, IBR, tiled, and custom structures. Our systems are carefully engineered to match your roof's profile and energy demands—offering clean energy without disrupting your existing operations.

How will Botswana Power Projects be implemented?

These projects, with a combined capacity of 1.5GW, will be implemented through private sector investment, with the Botswana Power Corporation (BPC) acting as the offtaker under long-term Power Purchase Agreements (PPAs) of up to 25 years.

How much shareholding does Botswana need to invest in solar?

“Utility-scale projects by foreign private sector entities require at least 40% mandatory shareholding by Botswana citizen-owned companies. However, small-scale solar PV investments are reserved for 100% citizen-owned companies,” Kenewendo added.

How much electricity does Botswana use a year?

Botswana currently consumes approximately 4,800 gigawatt-hours (GWh) of electricity per year, with a peak demand of 680 megawatts (MW) and a base load of 400 MW. Demand is projected to rise by five percent annually, reaching 7,000 GWh by 2040.
