

EQACC SOLAR

Brunei office building solar curtain wall brand

Overview

What is photovoltaic curtain wall?

Introduction: Photovoltaic Curtain Wall refers to a new type of building exterior wall system that combines solar photovoltaic power generation technology with building curtain walls.

What is a solar curtain?

The Solar Curtain utilizes flexible Organic Photovoltaic (OPV) panels as dynamic shading elements, functioning either externally or internally on building facades. While enhancing the visual appeal of glazed surfaces, these curtains simultaneously generate clean energy and regulate indoor environments.

How does a solar curtain wall work?

This system integrates photovoltaic components (such as solar panels) into the building curtain wall so that the curtain wall not only has traditional enclosure, decoration, and insulation functions but also can convert solar energy into electrical energy, providing green and clean energy for the building. Features
