Brunei solar Energy Storage Project

Overview

What is Brunei's largest national solar project?

KUALA LUMPUR: Solarvest Holdings Bhd's subsidiary Atlantic Blue Sdn Bhd has secured Brunei's largest national solar project, with a generation capacity of 30 megawatts (MW). The project will be developed through a joint venture company, Seri Suria Power (B) Sdn Bhd, in partnership with Serikandi Oilfield Services Sdn Bhd and Khazanah Satu Sdn Bhd.

Will Brunei build a solar power plant in 2022?

Construction of the solar power plant is slated to start in 2022, with \$50,000 earmarked to conduct a land survey in Kg Sg Akar. Both the Bukit Panggal and Belingus solar farms will produce 15 MW of solar energy. Apart from the three new solar power plants, Brunei will expand its solar energy project in Seria from 1.2 MW to 4.2 MW.

How much does solarvest cost in Brunei?

Solarvest says the project will be built for an estimated BND 34 million (\$26.46 million). Brunei's electricity generation is heavily dependent on fossil fuels, with a 95% share in 2024. The government targets to lower its GHG emissions by 20% from business-as-usual (BAU) levels by 2030, as it seeks to achieve a 30% renewable energy mix.

Why is Brunei launching a solarvest project?

Solarvest executive director and group chief strategy officer Leon Liew Chee Ing said the project reflects Brunei's strong commitment to a cleaner, more sustainable energy future, given the nation's abundance of fossil fuels.
