Bulgaria Solar System

Overview

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

Is Bulgaria getting more solar power?

Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power. Solar energy production has surged from one gigawatt (GWh) in 2019 to more than three GWh today, with solar accounting for nearly half of the country's electric capacity from renewables.

Who is global solar Bulgaria?

Global Solar Bulgaria – Да докоснем слънцето! Wide experience in the photovoltaic energy sector. Over 17,900 MW capacity. Wide experience in the industry, land supply, relationship and work with the state. A perfect combination of global experience and expertise to further focus on technological advancement. Surveillance and monitoring of systems.

What is Bulgaria's solar power potential?

Bulgaria's solar power potential is significant, especially in the southern regions. The country has rapidly expanded its solar capacity from 100 MW in 2011 to over 2,400 MW by 2023, with 600 MW added in 2022 alone. The largest solar parks are Dalgo Pole (207 MW) and Verila (123 MW).
