# **Bulk Procurement of High-Pressure Mobile Energy Storage Containers for Weather Stations**

## Overview

---

What is a high pressure hydrogen storage container?

This was a new type of high-pressure hydrogen storage container that had the advantages of high mass and volume density, good safety, low-cost parameters, and did not undergo hydrogen embrittlement. It was initially anticipated that this type of container would be combined with fuel cells and applied to various electronic mobile devices.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is the demand for hydrogen storage vessels in China?

The demand of Hydrogen storage vessels with a capacity of tons is increasing rapidly. Type IV cylinders of 400 L and larger for truck are developing rapidly in China. The non-destructive testing methods for on-board cylinders require further research. Hydrogen energy has emerged as a pivotal pathway for facilitating the global energy transition.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);

## Ground Gas Storage Solutions

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

Our composite ground storage vessels deliver compact, efficient, and high-capacity gas storage. Ideal for hydrogen stations, CNG facilities, and renewable energy sites.
