Bulk Purchase of High-Efficiency Solar-Powered Containers for Mining

Overview

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What are the advantages of a container roof solar system?

1. Integrated Solar Array High-efficiency solar panels installed on the container roof or fold-out frames.
2. Battery Energy Storage Lithium-ion or deep-cycle batteries store energy for use day or night.
3. Inverter & Control Systems Converts solar power to usable electricity with smart monitoring.
4. Weatherproof & Secure.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
