# **Cameroon Wind Farm Energy Storage Project**

## Overview

---

How much money does Cameroon need to build a solar power plant?

The first two modular solar power plants in Maroua and Guider, with battery storage and a combined capacity of 30 MW, were commissioned in September 2023. The Cameroonian government states that Cameroon needs almost 2000 billion euros to finance its energy projects.

Will Cameroon diversify its energy mix?

This project is expected to diversify Cameroon's energy mix, currently dominated by hydroelectricity, which accounts for 61.7% of national production, compared to 1% for biomass and 0% for wind power .

Will Cameroon have a solar power plant?

The Maroua and Guider power plants, Cameroon's first public solar project with a combined capacity of 30 MW, were commissioned by MINEE in September 2023. Additionally, a 20 MW solar power plant is planned for the city of Garoua.

Can Cameroon achieve 5000 MW by 2035?

The 2035 production estimate is based on the Energy Sector Development Projects (PDSEN) report in Cameroon. The current production is estimated at around 1600 MW. Considering the ongoing construction of power plants, future projects, and financing delays, achieving the 5000 MW goal by 2035 appears challenging.
