Should I use a 60V to 48V converter?

If you want to use all the remaining cells a "dc to dc converter 60V to 48V" would do just that. However they are hard to get for that voltage and high amps. if your controller can take 60v it will be fine just keep an eye on motor temps and avoid WOT if you find it gets hot Dana Point So. Cal It's. Best to have one big battery.

Do I need a 12V or 48V inverter?

Simply put, if you have a 12V system, you need a 12V inverter; a 48V system requires a 48V inverter. Standard Pure Sine Wave inverters simply change DC power to AC power. Inverter Chargers handle this function plus allow you to charge your batteries off shore power or a generator. Renogy's 3500W Solar Inverter Charger is designed for a 48V system.
