# Can't too batteries be shipped by air

## Overview

---

Should lithium batteries be shipped by air?

Regulations for shipping lithium batteries by air are in place to protect everyone who would come in contact with a lithium battery shipment while it is being transported as air cargo; with training being required for everyone in this supply chain, to protect the aircraft, and the people in the aircraft, that is carrying the batteries.

Can batteries be shipped by air?

Damaged, defective or recalled batteries are forbidden for air transport. However, batteries having some other defective feature (e.g., batteries with the incorrect model number on the label or batteries not holding enough charge) can still be shipped by air with proper packaging, labeling and documentation.

Can I ship a faulty battery?

Damaged or faulty batteries can potentially be very dangerous and pose an increased chance of causing fires and risking health and safety. Under no circumstances should you try to ship any type of battery by air or sea freight that is known or suspected to be defective.

Do I need a manual to ship lithium batteries?

However, if you only ship lithium batteries you can purchase the Lithium Batteries Shipping Regulations as a standalone manual. Knowing the specific regulations is crucial in the shipping and handling of lithium batteries.
