

# Can the t40 battery be equipped with an inverter

## Overview

---

What is the difference between DJI T40 & t20p intelligent flight battery?

When charging, the DJI Air-Cooled Heat Sink helps cool the battery down, reducing charging time and improving operation efficiency. The T40 Intelligent Flight Battery has a capacity of 30000 mAh at a nominal voltage of 52.2 V, while the T20P Intelligent Flight Battery has a capacity of 13000 mAh with the same voltage.

How long does it take to charge a T40 battery?

Directly connects to the T40 battery cooling tray, eliminating the need for additional connectors and ensuring quick, reliable charging. Ultra-fast charging: Fully charges T40/ T50 batteries in 9-12 minutes. Efficient fuel use: 30L tank charges 47 batteries, with 15% fuel savings.

What is the capacity of the T40 intelligent flight battery?

The T40 Intelligent Flight Battery has a capacity of 30000 mAh at a nominal voltage of 52.2 V, while the T20P Intelligent Flight Battery has a capacity of 13000 mAh with the same voltage. Refer to the Specifications for the compatible aircraft for each battery model. The T40 Intelligent Flight Battery is used as an example below.

How do I Check my T40 intelligent flight battery?

The T40 Intelligent Flight Battery is used as an example below. Press to check the battery power level. Press and then press and hold to power on the battery. Only power the battery on and off when it is connected to the aircraft. Otherwise, the power ports on the battery and the aircraft will be damaged. Indicate the battery level.

## Can the t40 battery be equipped with an inverter

---

### AGRAS T40

Powered by a 30000 mAh intelligent flight battery, the T40 can be charged in approximately two hours using the DJI Portable Charger. Additionally, the D12000iE ...
